

## C451C

### GbE IP Card & Main Control Card

1 channel gigabit IP input and output with UDP encapsulation

-----  
Input & Output:  
either 1×GBE (SFP) or 1×  
GBE (100/1000 Base-T)

#### Scrambling (option)

- 1×10/100BASE-T Ethernet port for scrambling, RJ-45

#### Control

- 1×10/100BASE-T Ethernet control port, RJ-45

#### Signal Processing over IP

- Total processing capability: 960Mbps
- Support 16 different TS streams input and 12 different TS streams output
- Packet length: 188 or 204 byte
- Support bit rate setting for each output
- UDP protocol, support SPTS and MPTS, unicast/multicast

Support IP address and port number setting for each output
